

Case Studies - Signs

// Location: **Geneva International Airport**

Project: - Replacement of Runway and Taxiway Signs

Contract: Whilst manufacturing the Movement Area Guidance Signs for Sydney International Airport, atg airports were also active in ascertaining another prestigious contract with Geneva International Airport.

Although the [Clearway signs](#)¹ have under gone testing to ICAO, CAP168 and FAA standards at an independent test laboratory, Geneva Airport requested a sample taxiway guidance sign to be installed, alongside seven other manufactures sign boxes, in order for the airport to conduct a full rigorous trial of the unit.

Geneva airport maintenance support team were responsible for monitoring the units at regular intervals and noting any areas of concern over a 12 month period.

On the successful completion of the trails the project was awarded to atg airports, where a total of 128 taxiway guidance and mandatory signs were supplied. The signs were manufactured and shipped within project time period, in two deliveries, so as to assist with the airports installation programme.
