

# Gatwick Airport Taxiway Rewire Phase One

---

## Project Key Facts

**Client Name** | Gatwick International Airport

**Compliance to** | F.A.A (Products)

**Dates** | 2014

**Total Project Cost** | £1.2M

---

Working directly with Gatwick airport, atg planned and executed a full upgrade of the airfield services. The existing materials had been in-situ for a period of years, and as part of FAA regulations, they were now statutorily due to be replaced.

Working between the hours of 11pm and 6 am to ensure minimal disruption, atg undertook the following:

### Project details:

- A complete taxiway rewire.
- New light installation
- Transformer installation.
- Switching unit installation.
- Modifications to light routing.
- New control panel installation for lighting arrangement

All work was completed on time and on budget.
