Runway Edge  
High intensity  
lighting solutions

## Compliant to Latest International Standards\*

- ▶ ICAO Annex 14. Vol 1
- ▶ FAA AC 150/5345-46
- ▶ FAA Engineering Brief No.67
- ▶ IEC 61827
- ▶ EASA
- ▶ Stannag 3316 (NATO)

---

## Applications

CAT I/II/III all weather operation airfield ground lighting (agl) systems.

---

\* As applicable to the application, compliance with other civil aviation and military regulations confirmed on request

\*\* as measured across the primary winding of an appropriately sized isolation transformer with a total fixture and transformer secondary length not exceeding - 1.85m (72').

\*\*\* electrical characteristics measured with 45 watt transformer, fitting can operate from transformers up to 210 watts.

Note: Isolating transformer shall be suitably sized to accommodate specific secondary and other applicable losses.

## Features

- Low energy consumption compared with the tungsten halogen equivalent.
- Greatly reduced maintenance: calculated MTBF of 75,000 hours at 6.6A.
- Operates on the full range of 2.8A to 6.6A on either 3 or 5 step IGBT, ferroresonant or thyristor CCRs that are designed in compliance with IEC or FAA requirements.
- Fully dimmable lights, replicating the response curve of traditional halogen lights.
- Full compatibility with existing airfield lighting series circuits. Installation on same mounting device as most conventional lights, for a straightforward replacement.
- Monitoring function of the individual light arrays for open circuit, short circuit, and over temperature. The LED light automatically disconnects from the secondary side of the isolation transformer, resulting in an open circuit condition.
- Low operating temperature, ensuring longer component life.
- FAA style 3, ICAO style 4 fixture with a 3.5 mm profile above gradient
- L-823 connectors
- Integral surge protection

## Environmental Conditions

- ▶ Ambient Temperature -55 °C to +55°C (-67 °F to +131°F)
- ▶ Storage Temperature -55°C to +70°C (-67 °F to +158°F)
- ▶ Atmospheric Altitude up to 10,000 feet ( 3000m)
- ▶ Relative Humidity 0-100% (sealed unit)
