

Transformer & Lamp monitoring Mounting brackets

Applications

Mounting brackets are designed for various isolating transformers. The bracket, when installed in a pit, allows for the AGL isolating transformers to be kept out of any standing water, helping reduce water ingress. Separating the isolating transformers, also helps with circuit identification, thus reducing the amount of time spent fault finding.

The brackets also can be utilized for mounting transformer switching units and lamp control and monitoring devices.

Transformer Mounting Brackets

Ordering Codes:

10W - 150W transformer

5 5 0 0 1 1 0 0

150W - 300W transformer

5 5 0 0 1 1 0 1

Features:

Fabricated from 2mm thick hot rolled mild steel made to BS1449 standards.

Finished with 'Permasint' polypropylene alloy to protect against corrosion in harsh environments.

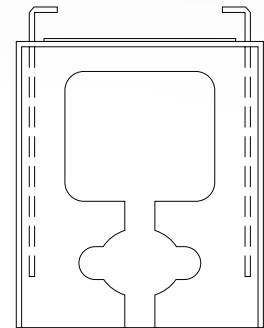

Available in two styles to suit the most commonly used transformer designs:

10W - 150W transformers

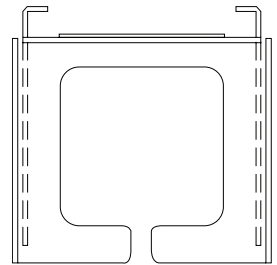

150W - 300W transformers

Also suitable for mounting lamp monitoring & switching units or switching transformer devices.

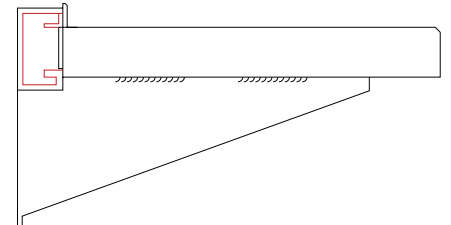

Overview

Holds up to a 150W transformer

Holds up to a 300W transformer

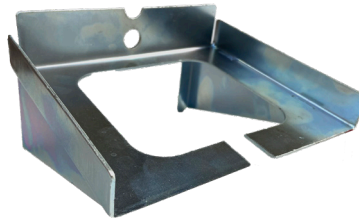

Mounted to channelling
(Unistrut or similar)

10W-150W Bracket

Transformer and TSU mounting

150W - 300W Bracket
