Environmental Policy	Date of Issue: 10/03/23	Revision E

Environmental & Sustainability Policy

It is the policy of atg airports limited to recognize our responsibility to protect the environment and minimize any adverse environmental impact of our activities, as far as is safe, practicable and economical, with the objective of being incident free.

It is also the policy of atg airports limited to identify areas of opportunity to develop an environmentally sustainable business.

Specifically, atg airports:

- Complies with all legal and client requirements at the locations where it operates.
- Defines environmental and sustainability responsibilities throughout the organization, in line with Health and Safety, and Quality responsibilities.
- Considers the environmental and sustainability impact, caused by our activities, so that any adverse effects can be identified, evaluated and actioned accordingly.
- Co-operates with external bodies and local communities who may be affected by our activities.
- Effectively manages waste in accordance with requirements, including policies and practices to ensure compliance with applicable WEEE regulations, pre-treatment requirements and recycling opportunities.
- Dedicated waste disposal streams for all of its wastes as a result of its operations.
- Develops employee awareness training and toolbox talks on Environmental and Sustainability issues and practices.
- Monitors Environmental and Sustainability Performance through audits, environmental risk assessments, incident/near miss reporting and investigation.
- Carries out Management Review of policy implementation and environmental and sustainability performance.
