

## FX862WBA

Runway threshold wingbar Elevated LED fixture High intensity lighting solutions

### Compliant to Latest International Standards\*

- ICAO Annex 14. Vol 1
- ▶ FAA AC 150/5345-46<sup>†</sup>
- ▶ FAA Engineering Brief No.67
- ▶ TP312
- ▶ MOS139
- ▶ IEC 61827
- ▶ EASA
- Stannag 3316 (NATO)

### **Applications**

CAT I/II/III all weather operation airfield ground lighting (agl) systems.

- \* As applicable to the application, compliance with other civil aviation and military regulations confirmed on request
- † Electrical/Mechanical/Environmental characteristics only

UK: +44 (0) 1942 68 5555 | USA: +1 (239) 985-9406

FX862WBA

#### **Electrical Performance**

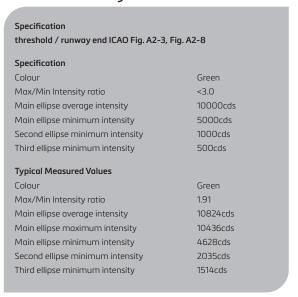

Main Beam Aperture Colour		Typical Power Consumption - Watts (VA) @ 6.6A					
Horiz(°)   Vert(°)			Per Beam	Fitting <sup>*</sup>		Tx Primary**	
. ,	1 ''		Watts nominal	Watts	PF	Watts	PF
-2 to +9	1 to 7	Green	22	24	0.98	24	0.98

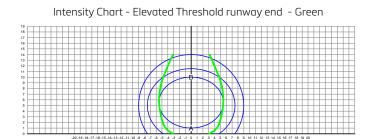

#### Fixture Operational Current Range: 2.8 to 6.6A RMS

- as measured at the input leads of the fixture.
- as measured across the primary winding of an appropriately sized isolation transformer with a total fixture and transformer secondary length not exceeding ~ 1.85m (72").
- \*\*\* electrical characteristics measured with 45 watt transformer, fitting can operate from transformers up to 100 watts.

Note: Isolating transformer shall be suitably sized to accommodate specific secondary and other applicable losses

### Photometry

#### **Features**

Low energy consumption compared with the tungsten halogen equivalent.

Greatly reduced maintenance: Estimated lamp life of 75,000 hours at 6.6A.

Operates on the full range of 2.8A to 6.6A on either 3 or 5 step IGBT, ferroresonant or thyristor CCRs that are designed in compliance with IEC or FAA requirements. Fully dimmable lights, replicating the response curve of traditional halogen lights.

Omnidirectional beam for circular guidance is available for bidirectional runway Edge fixture

No need to replace the CCRs, series transformers, or cables. Full compatibility with existing airfield lighting series circuits. Installation on same mounting device as most conventional lights, for a straightforward replacement.

Monitoring function of the individual light source. In case of a defect, the LED light automatically disconnects from the secondary side of the isolation transformer, resulting in an open circuit condition.

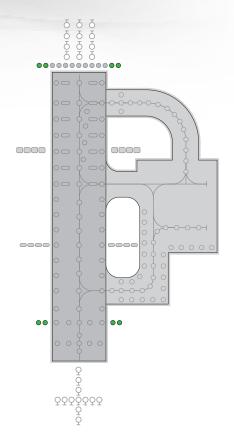

Low operating temperature, ensuring longer component life.

FAA L-823 connector

Sealed cable entry to main assembly interface preventing insect and water ingress.

powder coating, aviation yellow colour

Integral surge protection

#### **Environmental Conditions**

▶ Ambient Temperature -55 °C to +55°C (-67 °F to +131°F)

▶ Storage Temperature -55°C to +70°C (-67 °F to +158°F)

Atmospheric Altitude up to 10,000 feet ( 3000m)

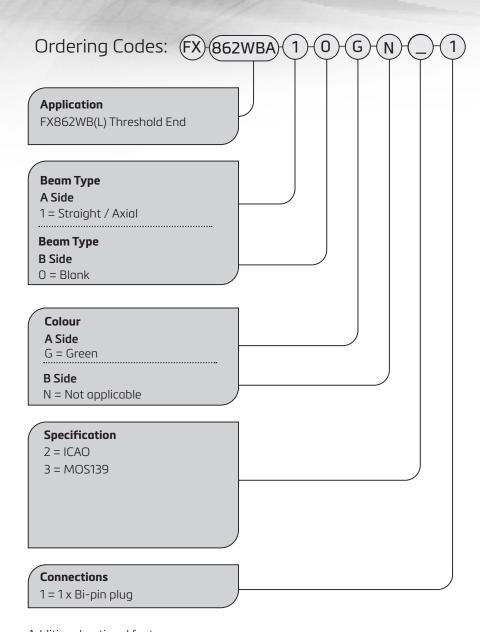

▶ Relative Humidity 0-100% (sealed unit)

Standards
