

Locking Style Communications Joint Kit Model CEG-72 (Resin Type)

indicative connection diagrams

Type

Model CEG-72 suitable for Communications Cable having two twisted data cores and an overall screen.

Features

The CEG-72PR kit contains a locking style plug housing and receptacle housing. The plug incorporates two small crimp applied brass pins for the data cores, one large crimp applied brass pin for the cable screen and a single-way cable sealing cone.

The receptacle incorporates two small crimp applied brass inserts for the data cores, one large crimp applied brass insert for the cable screen, and a single-way cable sealing cone. When assembly is complete, the plug and receptacle are filled with a fast curing resin, which gives the guarantee of complete dielectric strength and water tightness.

One kit is required for each splice or SmartSwitch Repeater installation.

Application

To provide separable waterproof connections between:

- SmartSwitches
- SmartSwitch Repeaters
- SmartSwitch termination units.

OR

To make separable waterproof splice in the Communication Cable.

The CEG-72R kit contains a locking style receptacle housing. The receptacle housing incorporates two small crimp applied brass inserts for the data cores, one large crimp applied brass insert for the cable screen, and a two-way cable sealing cone. When assembly is complete, the receptacle housing is filled with a fast curing resin which gives the guarantee of complete dielectric strength and water tightness.

One kit is required for each SmartSwitch and each termination unit.

Full installation instructions are provided with each complete kit.

NOTE

As these kits are sensitive to both the outside diameter of the cable and the wire size, for further information contact [atg airports](http://atgairports.com)
