

Environmental & Sustainability Policy

ATG Airports mission is to source sustainable and ethical products. It is our duty to recognise our responsibility to protect the environment and minimize any adverse environmental impacts of our activities, as far as is safe, practicable and economical, with the objective of being an environmentally friendly company

To help us achieve this we will:

- Comply with all legal and contractual requirements at all of the locations that we operate at.
- Define our environmental and sustainability responsibilities throughout the organization, in line with all Health & Safety and Quality Responsibilities.
- Consider the environmental and sustainability impacts caused by our activities so that any adverse or negative effects can be identified, evaluated and managed accordingly.
- Co-operate with all external bodies and local communities who may be affected by our activities.
- Effectively manage our waste streams in accordance with requirements, including policies and practices to ensure compliance with all applicable WEEE regulations, pre-treatment requirements and recycling opportunities.
- Put in place dedicated waste disposal streams for all of our waste as a result of our operations.
- Develop employee awareness training and toolbox talks for environmental issues and practices to ensure we clearly communicate our environmental goals.
- Monitor environmental and sustainability performance through audits, environmental risk assessments, incident/near miss reporting and investigation.
- Conduct management reviews of our policies and environmental performance.
